**Q&A**

**1.Why does the image look a little bit purple color?**  
Because the hidden camera without IR-CUT, it's normal with a little bit purple color

**2. The hidden camera dissipates heat, is it normal ?**  
Yes, it's normal. Please don't worry. As the camera has night vision feature with 16 infrared lights in it. It will turn off night vision automatically in the day time, its temperature will be down.

**3.Why it shows black and white image at night?**  
Because it has a night vision feature, the image is black and white at night. It will show color image in the day time.

**4.Why is the wifi connection intermittent?**  
Please keep the camera and your own router within 7-8 meters distance.

**5.What type of SD card is supported?**  
It supports FAT32(2G--32G) and exFAT (64G--128G) SD cards.

**6.The camera can not be connected to your router,why?**  
(1) The device supports 2.4GHz Wi-Fi network and IEEE802.11b/g/n mixed,don't support IEEE802.11.ac and 5GHz network.  
(2)Please make sure your WI-FI security is WPA OR WPA2 instead of WEP.  
(3)Please make sure your WI-FI SSID and password do not contain special characters. Such as: # , \$ , / , ; , etc

**7.Forget password or change usage environment?**  
Please use reset pin to press the resetting button for 9 seconds to restore factory setting.
