Note: The default login password of the client is admin;

(3) Click the preview icon to go back to the home page to preview the image, as shown below;

5, Common faults

(1), How to solve the problem that the connection cannot be connected and the AP hotspots cannot be searched?

A: If you can't find AP hotspots, you need to manually restore the camera Settings. Press and hold the trailing line reset button for about 10S to loosen

(2),How to solve the problem of wireless pairing?

A: In the process of WIFI matching, the mobile phone and camera should be close to each other. The wireless name and password should not have special symbols and Chinese characters, otherwise the pairing will fail.

(3),The camera shows online, but it can't be displayed if you just click in. How to solve this problem?

A: This is due to network reasons to set up the connection buffer, restart the router and camera can.
